

ISU TRIAL AWARDS FRANCE 2006

Heliopsis helianthoides var. *scabra* 'Summer Nights'

is a seed species named and distributed by the company Jelitto. The plant grows 120-160 cm tall. Simple flowers, golden yellow with a deep orange eye, up to 6 cm large. Flowering period from July to September. The foliage emerges as burgundy red. The stems are dark red brown as well. Nice border plant, ideal for cutting.

Originator: Dale Hendricks, North Creek Nurseries USA. Introducer: Jelitto Staudensamen GmbH, P.O. Box 1264, D-29685 Schwarmstedt, Germany. Tel: ++49 50 71/ 98 29-0, Fax: ++49 50 71/ 98 29-27, www.jelitto.com, info@jelitto.com.

Penstemon x mexicale 'Sunburst Amethyst'

is a hybrid between Mexican and American Penstemon-species by the company Jelitto. The height of the plant is 50 cm. This rich blooming plant has tubular purple flowers with white throats. Flowering period from June to September. Used in planters, rock garden or sweeping drifts in the border.

Originator and Introducer: Jelitto Staudensamen GmbH, PO Box 1264, D-29685 Schwarmstedt, Germany. Tel: ++49 50 71/ 98 29-0, Fax: ++49 50 71/ 98 29-27, www.jelitto.com, info@jelitto.com

Astilbe 'Color Flash'

was bred by an amateur from Emst (Holland) and discovered in his inheritance after his death. Unfortunately the parent plants are not known. The plant grows 45 to 50 cm tall. Striking foliage, leaves emerge as a fresh green, maturing to blazing shades of orange and red. Pale pink flower plumes, 10 to 15 cm long. Flowering period July to August. A perennial for semi-shaded to shaded habitats with leaves that provide a flash of color.
