

Perennial Plant in the Picture !

Persicaria amplexicaulis 'JS Calor' PBR - A new Persicaria selected by Jan Spruyt. He is very rich flowering because he makes 2 flowers on each branch. The colour is red-pinkish and the flower is thick and full. Like all other-JS-selections this is **free** from diseases, in this case **no spider mites** . He keeps his flowers a lot longer than his "brothers and sisters", because he' more cold-resistant. Height : 90cm (leaf 60cm) Flowertime : 8-11 Colour : red-pink
Recieve a **ISU Award in 2012** by the trial commission of the ISU in Appeltern -Holland.

Persicaria amplexicaulis 'JS Caliente' PBR

A new Persicaria selected by Jan Spruyt. He makes very thick and colourfull flowers.

The colour is full red and the form of the flower is very beautiful and almost identical.

He is very steady and in that way perfect for the garden and other places.

Height : 70cm (leaf 50cm) Flowertime :7-10 Colour : red Info & pictures by Nik Spruyt
